1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-17 are rejected under 35 U.S.C. 102(b) as being anticipated by Touchton et al (Pat. No. 6,043,748).

Touchton et al teach a method of containing an animal within a defined area and an animal containment system including a receiver unit carried by the animal including a GPS receiver 14 for receiving satellite data, a memory (col 2, line 58) for storing a plurality of waypoints defined a boundary, a simulation circuit (col 3, lines 18-21), and a processor coupled within the GPS receiver and the stimulation circuit, the processor (22; fig. 2) activating the stimulation circuit at a distance from the boundary, dependent upon animal positional variables when the animal is within the boundary.

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
